U-Edge Pro INNOVATIVE GRINDING OF FILLET WELD SEAMS

The U-Edge Pro impresses with its effective and precise machining of fillet weld seams and offers maximum tool life combined with minimal effort.

- Highly versatile: ideal for grinding, correcting, cleaning and optical smoothing of weld seams.
- Durable abrasive cloth: consistent performance down to the very last grain.
- Integrated edge protection: prevents damage to the workpiece.
- Patent-pending technology: innovative design for precision and the latest applications.

V2 Edge CeramicAd OUTSTANDING PERFORMANCE FOR DEMANDING GRINDING WORK

Specially developed for tough jobs on tempered steels and coated surfaces, the V2 Power flap disc offers an outstanding tool life and high precision.

- Innovative glass-fibre fabric carrier: stable and flexible for the best surface results.
- Patented flap shape: reduces noise and vibrations by 50%.
- Maximum sharpness: worn flaps are replaced by fresh ones, consistent quality.
- Versatile application possibilities: for machining radial and end faces, ideal for complex geometries.

SLTflex CeramicAd FLEXIBLE FOR HARD-TO-REACH AREAS

The SLT flex flap disc offers maximum flexibility and removal rates when machining hard-to-reach areas and uneven surfaces.

- High flexibility: ideal for uneven surfaces and hard-to-reach areas.
- Patented flap shape: reduced noise and vibrations, better surface results.
- Long-lasting sharpness: multi-layer abrasive coating for consistent performance.
- For use on radial and end faces: flexible grinding pattern when used on face ends, ideal for grinding fillet welds.
