# SLTO and SLTR CeramicAd

LAMELLAR FLAP DISCS

flat

2  
types

angled

- the all-round talent with advanced cloths
- available in two types: flat and angled
- lightweight carrier material for low tool weight
- long tool life thanks to multi-layer abrasive coating
- self-sharpening effect: high removal rate, especially on stainless steel

flat and angled

**SLTO/R CeramicAd**

# ADVANCED CERAMIC CLOTHS

Our all-round talent. For faster and more powerful grinding jobs.

- The flat carrier disc of the SLTO and the dished carrier disc of the SLTR offer versatile solutions for a broad range of applications. With their lamellar and the glass-fibre back plate, they are well-suited for the every day use.
- The new CeramicAd (Advanced) is the next development of the red ceramic cloth: faster and more powerful! The back plate stability and grain adhesion of the CeramicAd are precisely matched and guarantee the maximum performance of the lamellar flap disc.
- They are impressively efficient: aggressivity, a long tool life and an unbeatable price-performance ratio.
