NEW

U-EDGE PRO

FILLET WELD GRINDING DISC

- pinpoint machining of every welding seam
- innovative new development that eliminates any application compromises
- multiple layers of abrasive cloth
- integrated twisted edge protection prevents any damage of the workpiece
- long tool life

INNOVATIVE

Eliminates any use
of grinding discs and
lamellar flap discs

U-EDGE-PRO

INNOVATIVE GRINDING OF FILLET WELDING SEAMS

More effective, more ergonomic, cleaner and more precise, it combines welding seam machining with a long tool life and perfect results.

- Thanks to its multiple layers of twisted abrasive cloth, this patent-pending tool always offers you consistent results down to the last abrasive grain.
- Whether for grinding over fillet welding seams, grinding of corrective welding, for cleaning, paint stripping or visual optimisation: the radial abrasive surface on the disc allows the application on almost any welding seam.
- Additionally, the integrated edge protection prevents any damage of the workpiece when machining welding seams.

Product number	Description	Grit size	D mm ø	Pack contains
A27401250402071	U-Edge Pro 125	ZK 40	125	5
A27401250602071	U-Edge Pro 125	ZK 60	125	5
A27401250802071	U-Edge Pro 125	ZK 80	125	5

Recommended for: ● Inox/Steel ● Steel ● Aluminium ● Titanium ● Cast material
